2027 yCAM FORUM

EUROPE MAKES CERAMICS

Berlin
3-5 May

Come sit as SESSION CHAIR

Wassily Chair, *Marcel Breuer*

In 1925, a 23-year-old Marcel Breuer, head of the Bauhaus furniture workshop, looked at the handlebars of his bicycle and wondered: why not bend steel tubes into a chair? The result, later nicknamed "Wassily" after his colleague Kandinsky, became one of the first tubular steel chairs and an icon of the Bauhaus, the school that closed its doors in Berlin in 1933. Proof that the right material, shaped the right way, can change everything.

What will be your role?

- Before the start of yCAM 2027, co-review abstracts related to your session
- During yCAM 2027, chair your session!

Who can apply?

- Everyone interested in AM of ceramics and the topics of yCAM 2027
